PennTech Machinery Corporation announces the signing of a Joint Venture agreement between PennTech Machinery Corporation and Shanghai Tofflon Science and Technology Corporation. The Joint Venture, PennTech-Tofflon, is located in Ivlyland, Pennsylvania.

About PennTech

PennTech is an established manufacturer of aseptic pharmaceutical processing equipment. In addition, PennTech manufactures Automatic and Semi-Automatic Loading and Unloading Systems for lyophilizers. penntech-corp.com

About Tofflon

Tofflon is the world's largest manufacturer of lyophilizers (freeze dryers), with annual shipments in excess of 200 units and over a thousand installations worldwide. tofflon.com
Tofflon manufactures small laboratory size units through full scale large production scale freeze dryers.

About PennTech-Tofflon

PennTech-Tofflon markets and services Tofflon lyophilizers for pharmaceutical/biotech applications in North America. Says Ger Smit, president of PennTech-Tofflon: "The synergy between the two companies compliments the need for single source fill-finish lines pertaining to liquid and lyophilized products. Today, any pharmaceutical company with this processing requirement is forced to go to Europe for equipment and testing. Amongst others, this creates challenges in the areas of communication, time differences, and exchange rates. The Joint Venture provides its customers the opportunity to obtain and test all the necessary equipment here in the United States." PennTech-Tofflon will have a freeze drier on display at the 2008 Interphex Show in Philadelphia.

PennTech-Tofflon's Website (penntech-tofflon.com) is currently being developed and will be up and running by the end of October.
